HEADQUARTERS OF GEN. VON FALKENHAYN, RUMANIAN FRONT, JAN. 6.—The war correspondents who have spent the last 25 months on the eastern battlefield have seen so many awful sights that the ordinary terrors of the war hardly impress them, but even the most callous of them shuddered when they witnessed the destruction of a whole Rumanian company of 250 men by two German machine guns.

MIXING OF BREAD AND POTATOES BAD

Expert Finds Mixture Damaging To Health; Many Old People Succumb.

BERLIN, Germany, Jan. 6.—A board of physicians which had been working to discover whether or not the effect of national food shortage has been detrimental to the German nation as a whole recently conducted interesting tests on some 6000 school children. They found that in the rural districts the children were about normal, while in the congested centers the children were for the most part two inches shorter and two pounds lighter than they should be.

High Death Rate Due To Food Shortage.

Dr. Zedek, a prominent member of the examining board, is of the opinion that the mixture of bread with potatoes is decidedly dangerous. He believes the increase of the death rate by 8 percent in Berlin is due to the shortage of food. The condition of old people, consumptives, women of the laboring classes and those suffering from nervous diseases is continually getting worse, for which he blames the shortage of food and the increased over-exertion. He further states that the psychological depression which has settled over the residents is also the cause of many deaths.

Army Sickness Decreases.

Dr. Hirsch, of the Prussian war board, in a statement to the press, says that on the basis of the monthly averages, the number of men reported sick per 1000 of the field army was 1000 in 1914, 1915, 1916, 1917, 1918, 1919, 1920, 1921, 1922, 1923, 1924, 1925, 1926, 1927, 1928, 1929, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1948,
